SP140 WAX DIP TANK

Our SP140 wax dipping tank has been designed for people looking to manually wax dip their birds. This tank has 140 liter capacity enabling people to do larger numbers of duck and game and also allowing enough length in the tank to fully wax dip turkey and geese.

It uses a single phase 4kW heater that requires a 32amp supply. This heats the outer hot water jacket, and the temperature is controlled via a built in thermostat.

Comes with built in control box, auto fill box and adjustable feet, all stainless steel construction.

The tank is fully insulated as standard and can be used alongside our SP70 wax reclaim tank.

FEATURES

- ✓ Single phase, 4kW heater
- ✓ 140 liter capacity dipping tank
- ✓ Control box
- ✓ Auto fill box maintains water level in the jacket
- ✓ Built in thermostat allowing constant temperature control
- ✓ All stainless steel construction
- ✓ Inner dipping tank dimensions: L 730 x W 430 x D 450 mm
