

SEDGBEER

SPM 1.1 & SPM 2.1 Rotary plucking machines

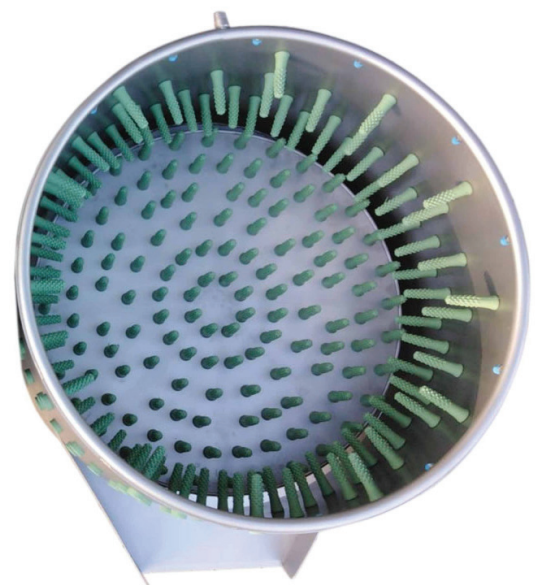

High capacity rotary plucker, the SPM1.1 and 2.1 plucking machines are the perfect alternative to drum pluckers. They can quickly and easily pluck several scalded chickens at a time.

They make plucking easier and faster. Particularly appropriate for small processing units wanting to up their capacity. This new design is all stainless steel construction, is extremely hygienic, easier to clean and a slightly larger capacity than the previous models.

The plucking fingers are positioned in such a way as to offer optimum plucking results.

The SPM 2.1 rotary plucker is also available with a side door and a specific table designed to let birds slide directly on the table when plucked.

This rotary plucker is entirely made of stainless steel. Delivered assembled and ready to use.

TECHNICAL SPECIFICATION SPM 1.1

13 flat spray nozzles evacuate water and feathers quickly and effectively

Adjustable feet and rubber plucking fingers

Feather and water discharge shoot

Water connection (for cold water)

Automatic grease lines for ease for maintenance

125Kg - Ø 800mm < 84dB

As a guide, you can simultaneously pluck:
10-15 small chickens,
5-7 free-range chickens (from 3.5 to 4kg)

1,1kW, 415V three phase or 230V single phase.
Power transmission > 2 belts
Complete with cable and electrical switch box

TECHNICAL SPECIFICATION SPM 2.1

15 flat spray nozzles evacuate water and feathers quickly and effectively

Adjustable feet and rubber plucking fingers

Feather and water discharge shoot

Water connection (for cold water)

Automatic grease lines for ease for maintenance

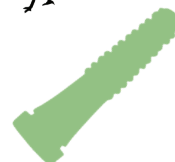

165Kg - Ø 950mm < 84dB

As a guide, you can simultaneously pluck:
20-25 small chickens
10-12 free-range chickens (3.5 to 4 kg)

2,2kW, 415V, three phase.
Power transmission > 3 belts
Complete with cable and electrical switch box
